Projects

Project Name : Zomatoo

Overview : Zomatoo is a comprehensive web application designed to facilitate the online ordering of food from various restaurants. The platform provides users with a seamless experience in discovering, filtering, and ordering their favorite meals. Leveraging modern web technologies like React, Node.js, Express.js, and MongoDB. Zomatoo offers a user-friendly interface, efficient data handling, and scalable backend services.

Technical Stack :

Front End
HTML & CSS : For the structure and styling of the user interface.
React : For building a dynamic, component-based UI that updates efficiently with user interactions.

Back End
Node.js & Express.js : For server-side logic, API development, and handling client-server communication.
MongoDB: As a NoSQL database for storing user data, orders, and restaurant information.

Additional Technologies
Axios: For making HTTP requests from the frontend to the backend.
Mongoose: For MongoDB object modeling, providing a schema-based solution to model application data.

Personal Details

Name	Mohanashanmugapandian K
Father's Name	Kumaresan K
Data of Birth	18-11-2003
Gender	Male
Languages Known	Tamil, English
